

## Entering the Start Chute

Please take a moment to understand how our start zone system works.

- The start chute is separated into Classe Speciale (**CS**) and six speed related start zones.
- Start zones are allocated according to the anticipated speed provided at registration and are labelled **A** (fastest) through to **F**.
- Race numbers have a letter prefix that corresponds to the rider's start zone.
- CS does not have a letter prefix. CS riders can move to the CS or any other zone.
- Riders can only enter their designated zone or a slower zone. *Moving forward to a faster zone is not permitted.*
- There will be entrances on both sides of the chute for each zone, except CS.
